- Service towns
- Local and Niche nodes
- Roads
- Commuter areas
- Functional Urban Area
- Functional Link Urban Area

# Orphans & Vulnerable Children

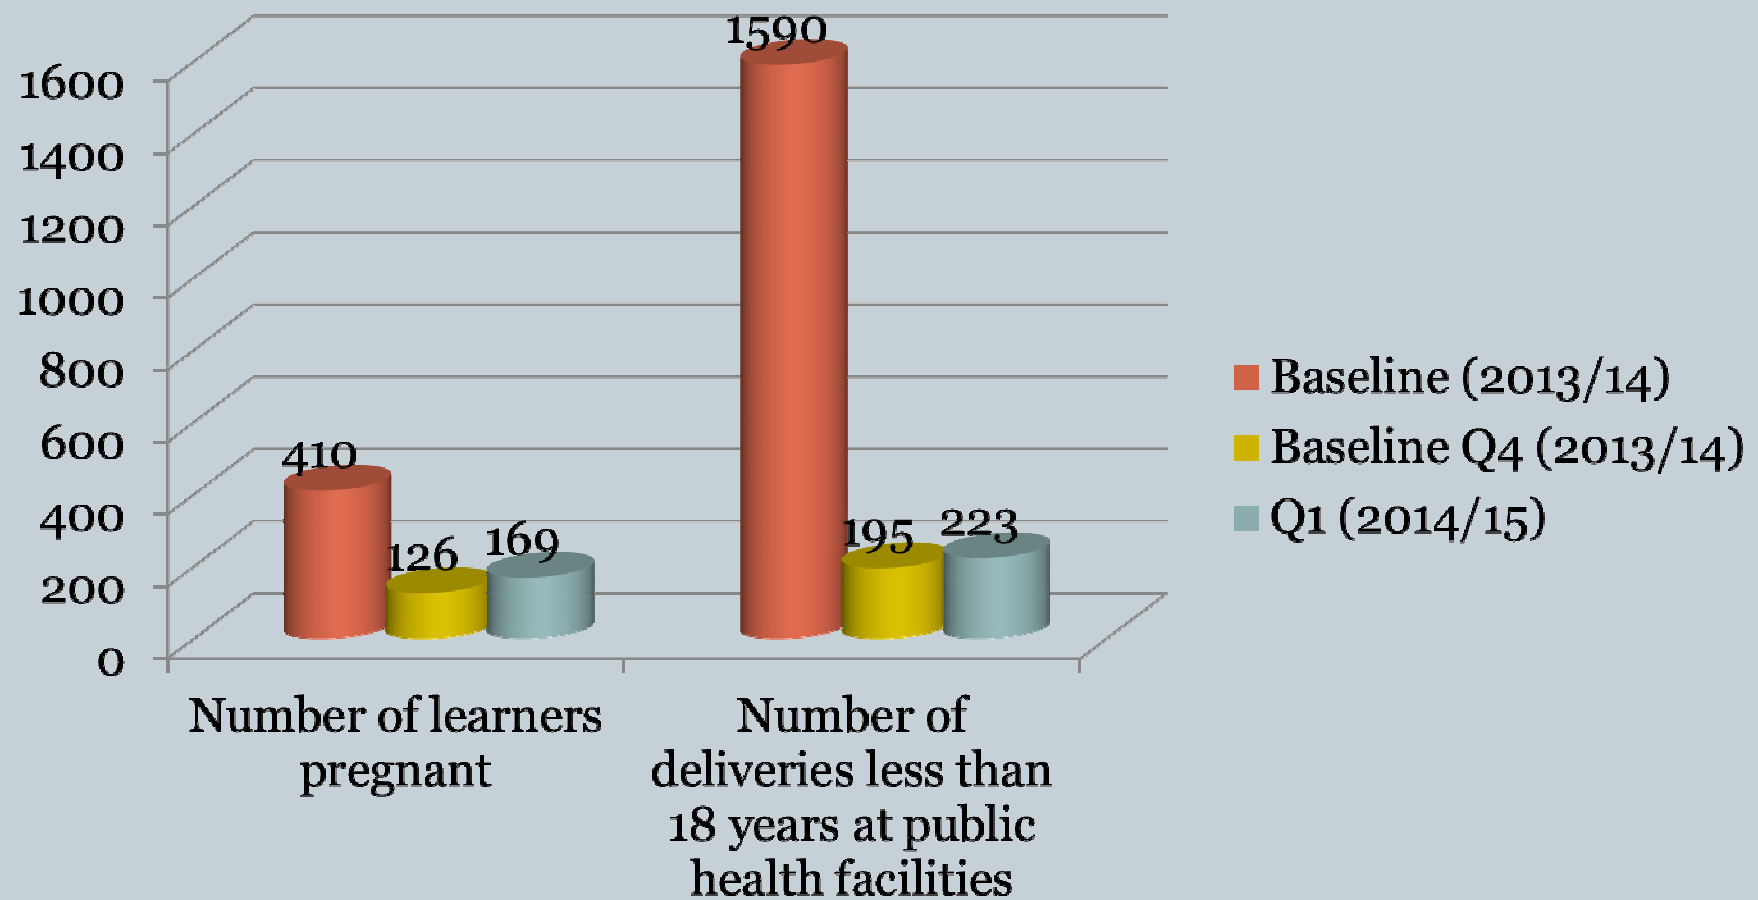

# Orphans Vulnerable Children

- Target still not met as staff restructuring still not completed.
- Umzimkhulu service office still not fully functional due to offices not environmental conducive for work purposes.
- Policy change with DOJ on foster care placement. (if one parent deceased and other missing cases are not finalised).
- Recommendations
- Umzimkhulu Service Office the matter is being attended by the Office of the MEC.
- Policy change with DOJ has been escalated to DSD Provincial Office.

# Life Skills

# Life Skills

- Number of learners falling pregnant is increasing likewise the number of under 18 years deliveries and under increasing, sub-district identified Ingwe and Umzimkhulu.

## ☐ **Recommendations**

- Community dialogues will be targeting those two sub-district.
- School health services to be strengthened in all sub district.

# Condom Distribution

	Baseline (2013/14)	BaselineQ4 (2013/14)	Q1 (2014/15)	Quarterly target (2014/15)
Number of Male condoms distributed	4 214 898	1 216 481	1 044 505	2 314 388
Number of Female condoms distributed	211 701	53 992	78 016	40 001
Number of secondary condoms distribution sites	500	500	500	500

# Condom Distribution

- Only 60% of quarter one target was achieved, improvement is anticipated in quarter 2 due to the availability of condoms as opposed to stock out during the month of May.
- The table exclude community condom distribution which is 346 450 for Q1.

## ☐ **Recommendations**

- District contracted service providers to assist in male condom distribution, contract commencement date is October 2014.
- Community condom distribution strengthening emphasis is going to be in all war rooms.
- Monitor condom distribution at garages, hotels and taxi ranks as a part of treatment package.

# HCT & TB Screening

	<b>Baseline (2013/14)</b>	<b>Baseline Q4 (2013/14)</b>	<b>Q1 (2014/15)</b>	<b>Quarterly target (2014/15)</b>
Number of new HIV tests carried out	146 216	38 501	32 440	29 161
Number of HIV positive tests	20 108	2 864	2 368	
Number of TB/HIV co- infected patients	1 461	504	481	100%

# HCT & TB Screening

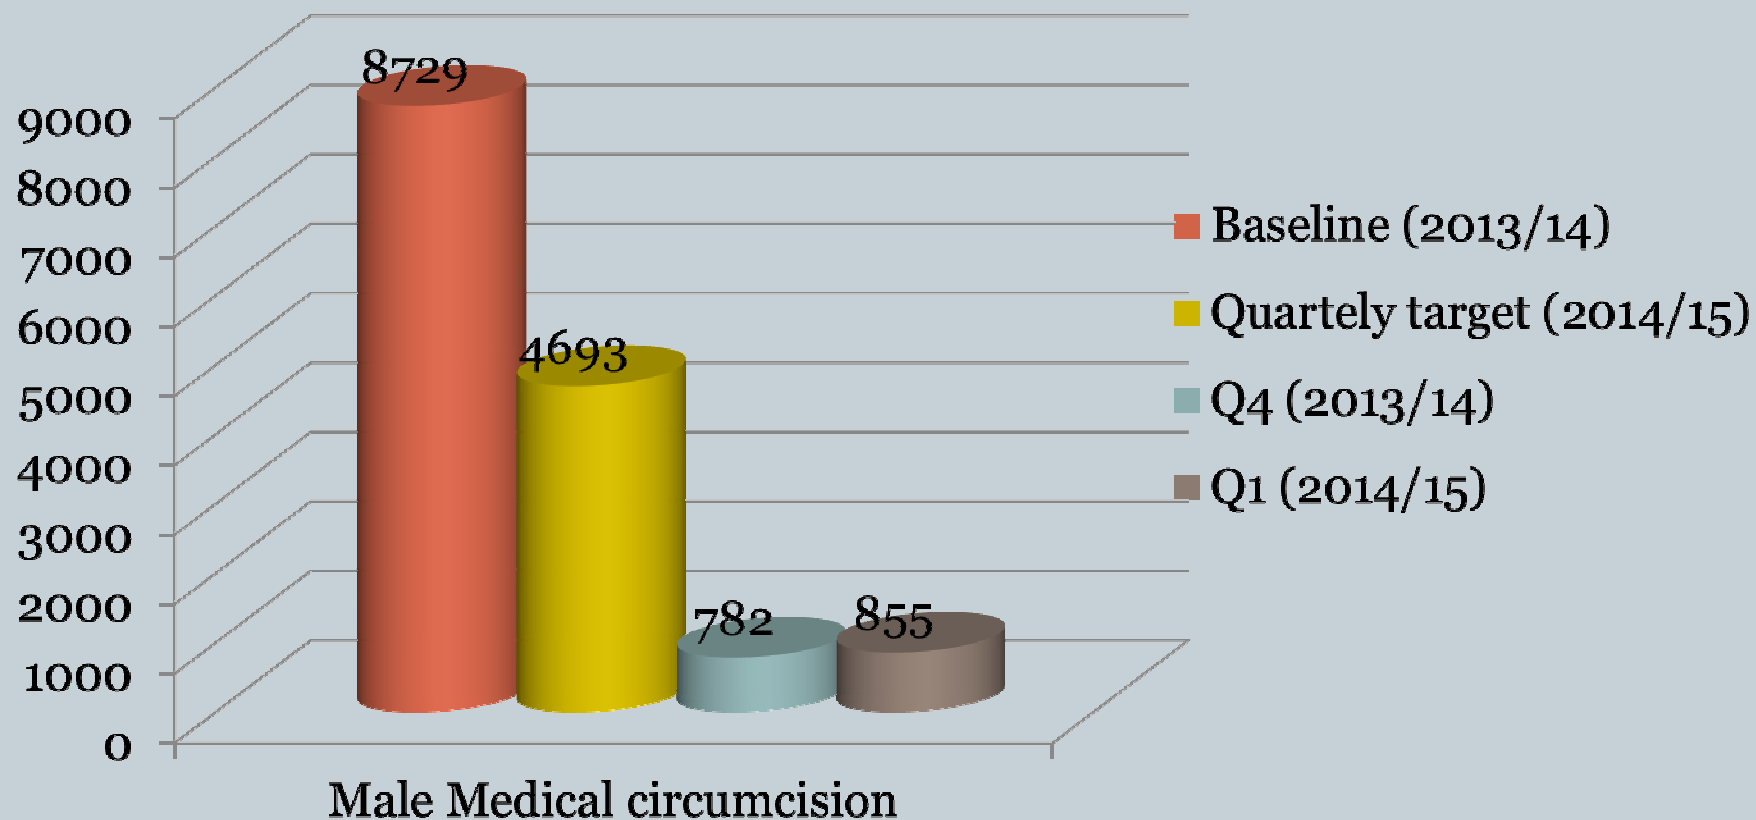

- Quarterly target of 29161 achieved and more at 126% in quarter one
- Hlola manje campaigns have been revived.
- HIV TB co-infected placed on ART are below target.
- High staff turnover of NIMART trained nurses.

## ☐ **Recommendations**

- Campaigns should be linked to war rooms and strengthened involvement of all departments.
- The functionality of local nerve centers to be strengthened.
- Provider initiated counseling and testing (PICT) trainings will be continued.
- Ongoing mentorship of NIMART trained nurses.

# Male medical Circumcision

# Male Medical Circumcision

- MMC target not met due to infrastructure and failure to recruit non-school leaving age.

## ☐ Recommendations

- Training of Doctors for MMC for complicated cases.
- To hold imbizo's and presentations to the LAC structures.
- Implement MMC escalation plans at all sub districts and monitor high volume sites.
- Monitor daily norm of 10 MMC per institution.

## Prevention of HIV Transmission from Occupational Exposure, Sexual Violence

	Baseline (2013/14)	Q4 (2013/14)	Q1 (2014/15)
Number of new sexual assault cases	476	62	55
Children under 12 sexually assaulted rate	27.93%	29%	23.6%

# Prevention of Exposure to transmission from Sexual violence

- Only 27 out of 55 assaults were offered prophylaxis, 17 reported after 72hrs.
- 2 tested positive before PEP.
- 9 were already on ART.
- High number of clients who reported after 72hrs can be due to lack of knowledge.

## ☐ **Recommendations**

- HCW to be trained on management of sexual assaults guidelines.
- Educate all stakeholders on awareness towards dealing with sexual assaults.

# Sustain Health & Wellness

	Baseline (2013/14)	Q4 (2013/14)	Q1 (2014/15)
Number of Children receiving ART	2314	2 314	2 496
Number of adult receiving ART	34229	34 229	34 925
Number of ART patients de-registered due to loss of follow up	1514	544	614
Number of ART patients de-registered due to death	583	120	134

# Sustain Health & Wellness

- Number of ART patients de-registered due to death is increasing.
- Clients with high CD4 cell count not ready for initiation, they delay to come for ART initiation until they are very sick.
- Number on ART loss to follow up is increasing.
- Follow up is affected by wrong address given on ART initiation.

## ☐ **Recommendations**

- Facilities to strengthen tracing mechanism by using Tier net weekly and monthly lists of missed appointments and link them to CCG's.
- Strengthening of adherence classes and psychosocial support.
- In-service training of Lay councilors and CCG's.
