

UMkhanyakude District Presentation
Quarter 1-3(2014/15)
To the KZN PCA Meeting
11/03/2015

Presented by Cllr SJ Vilane
Mayor of uMkhanyakude District Municipality &
Chairperson of uMkhanyakude District AIDS Council

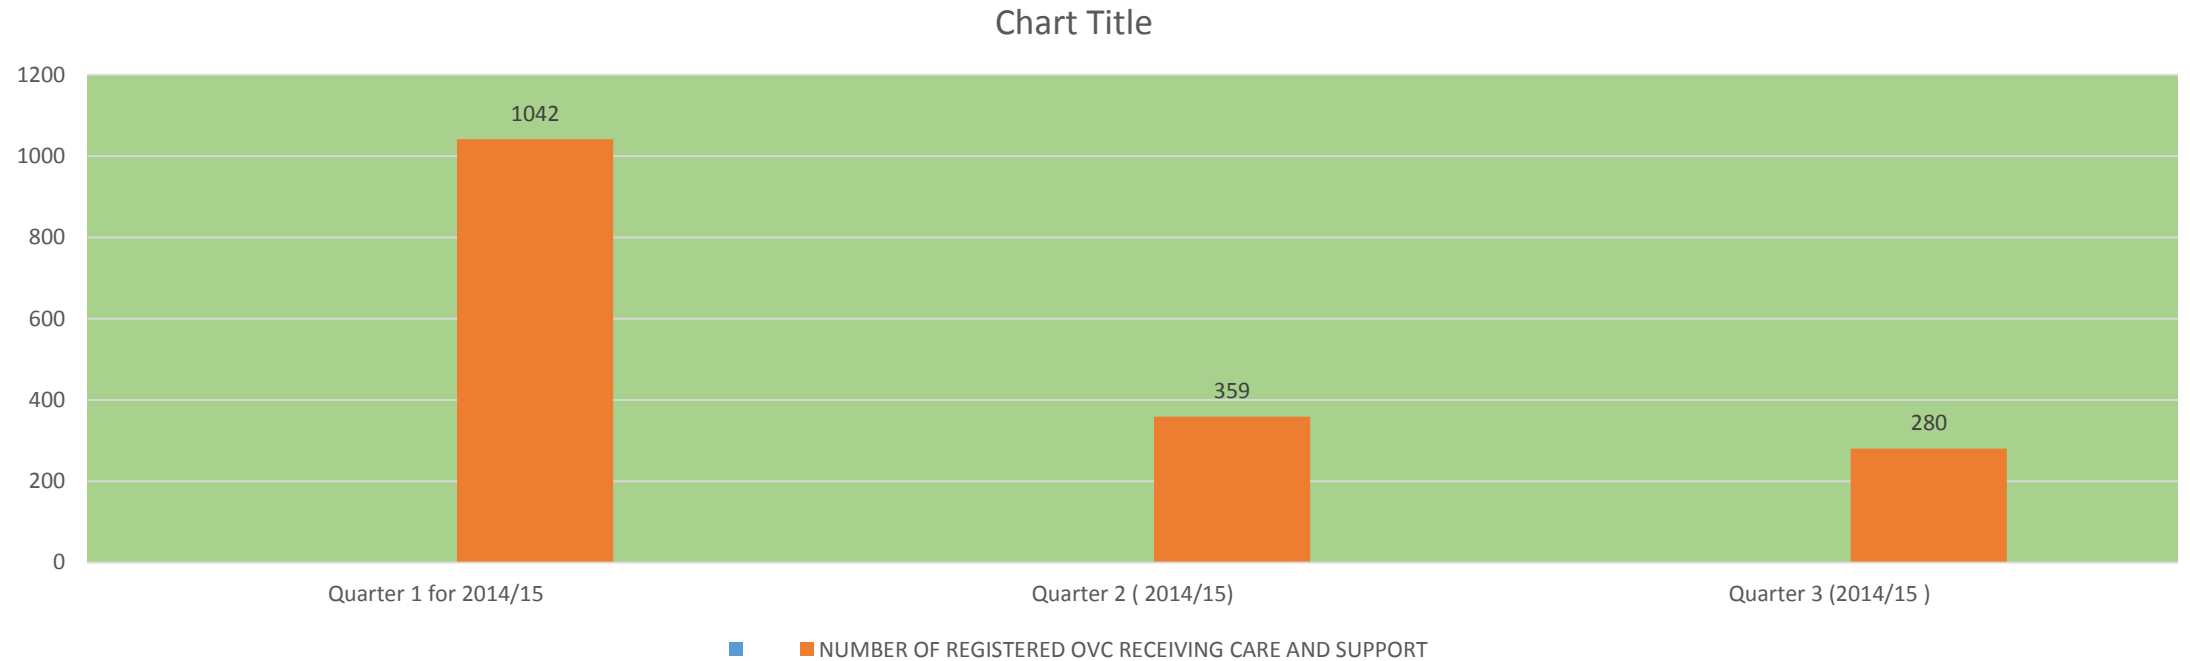

Newly Registered OVC

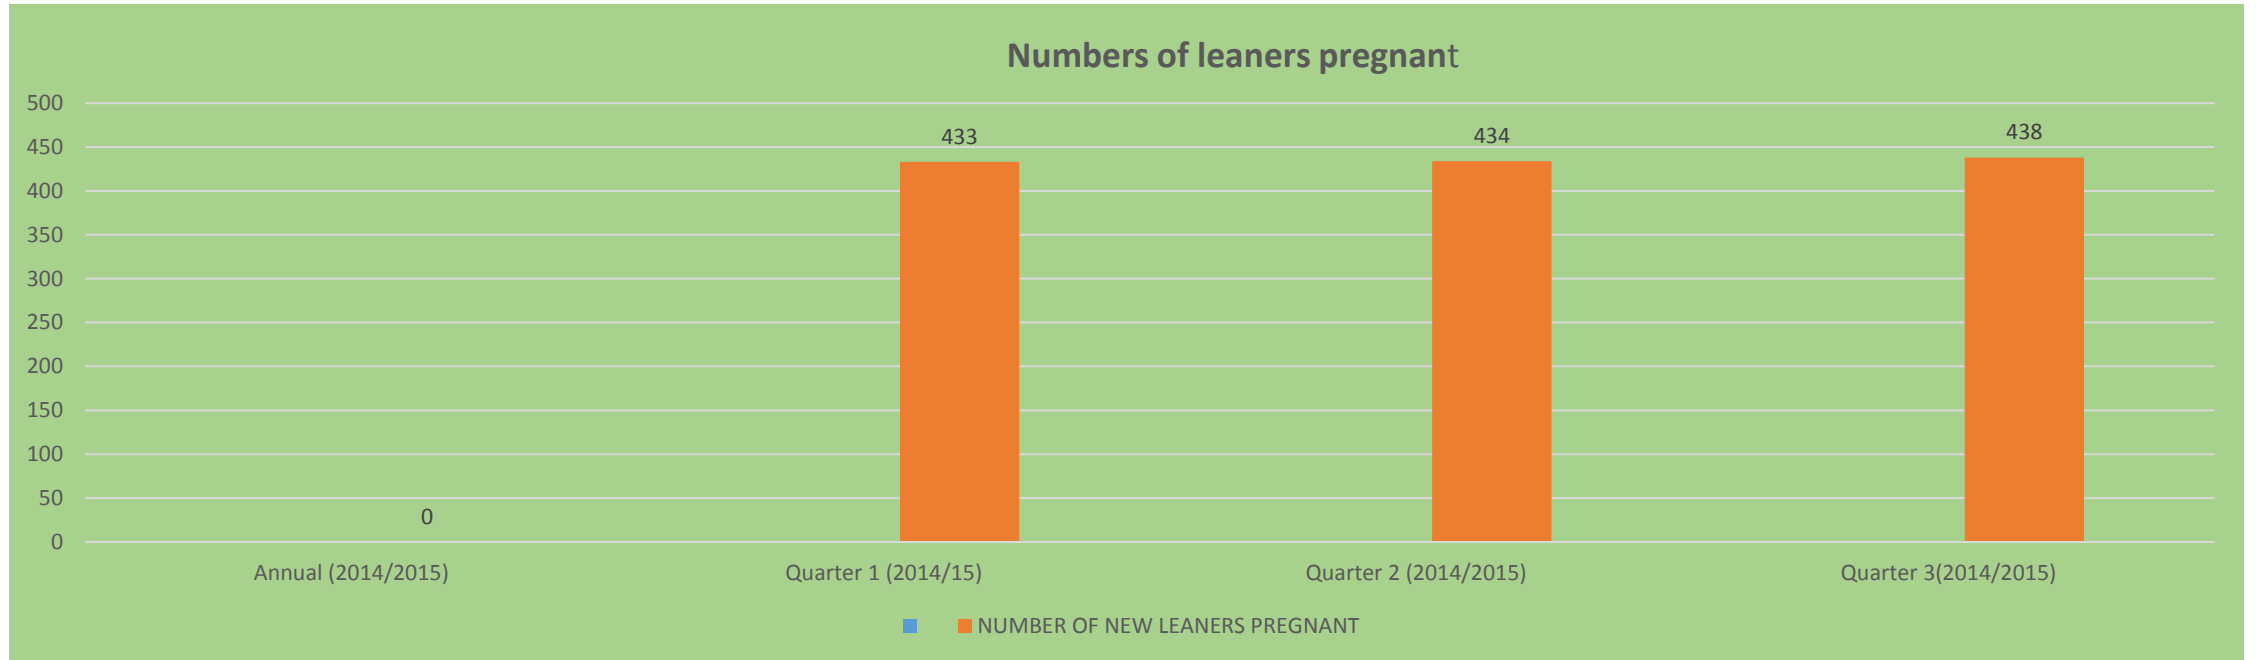

- Comment: Newly registered has decreased as compared to Q2

Number of registered OCV Receiving care & support

- Comment: Registered OVC receiving care and support has decreased to 280 compared Q1-2

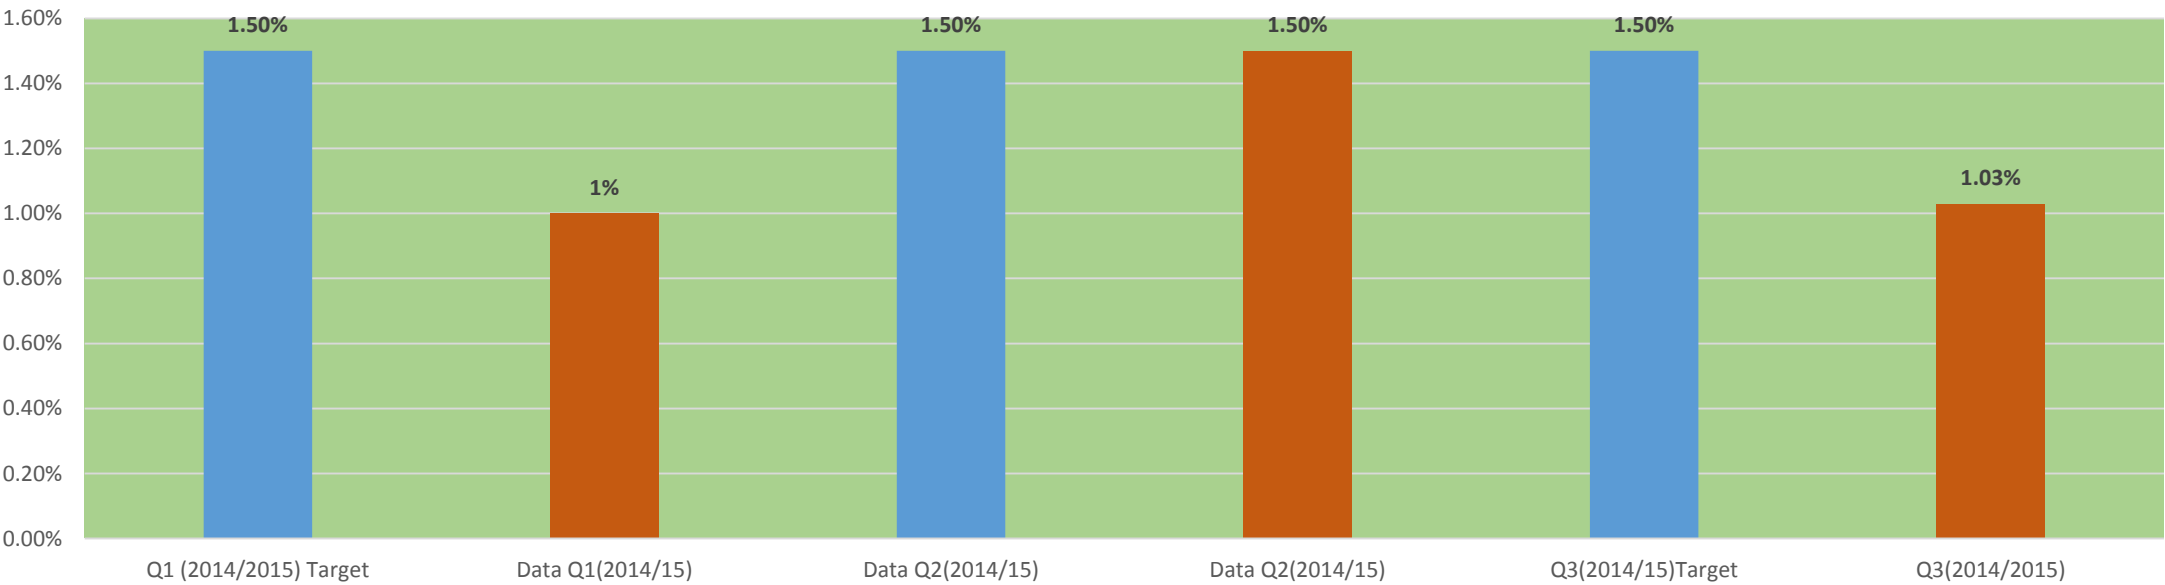

Life Skills

- Comment: All Local Municipalities with partners have their programmes in place in the fight against teenage pregnancy.
- DramAide with partners had recently launched the VMMC Salon advert which encourages the dual protection

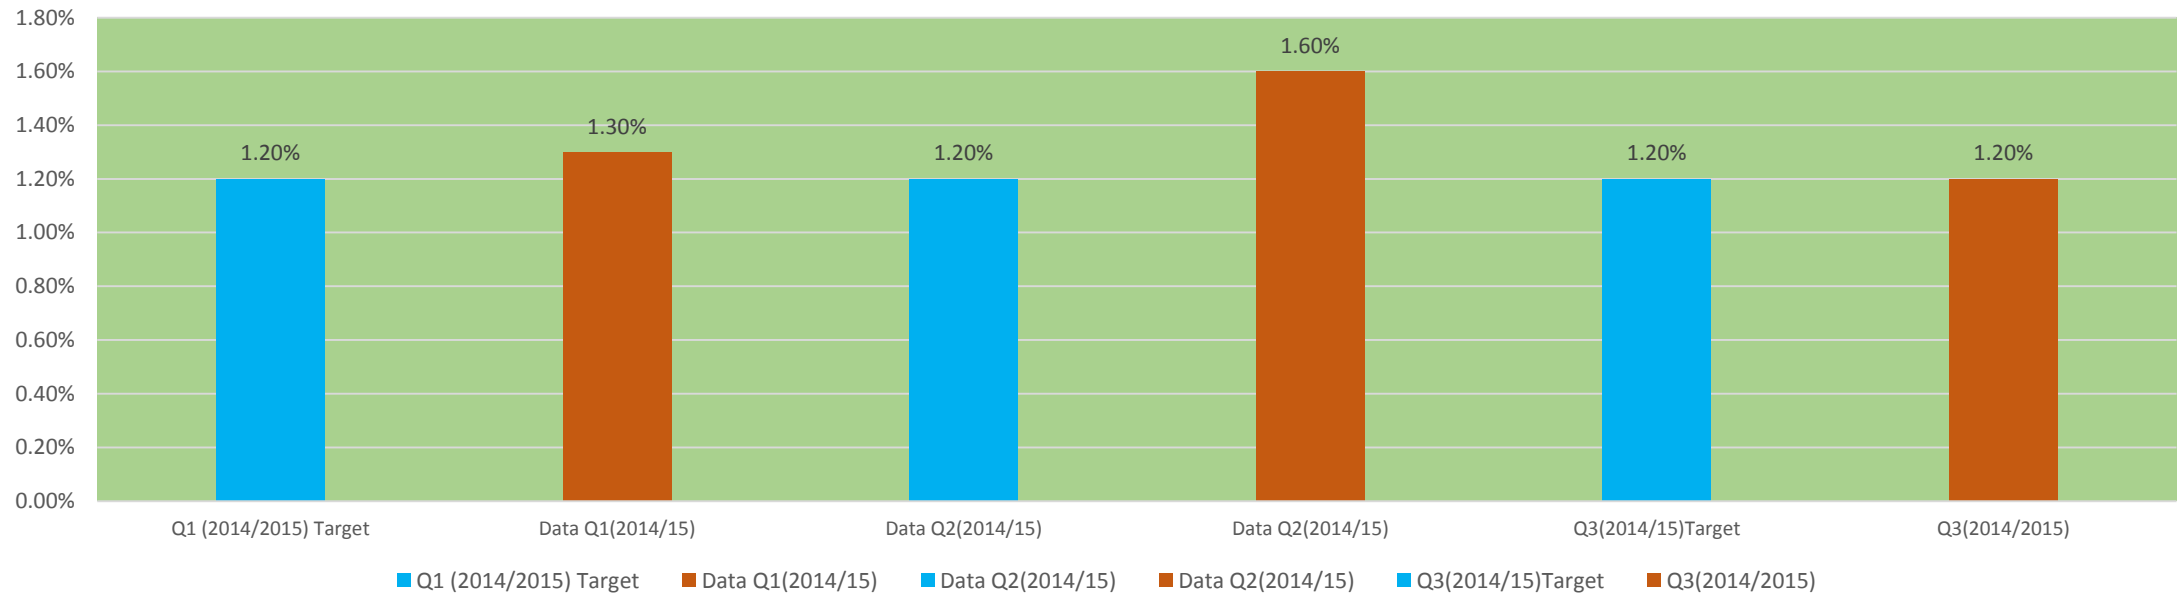

PMTCT

BABY PCR TESTED POSITIVE AROUND 6 WEEKS RATE

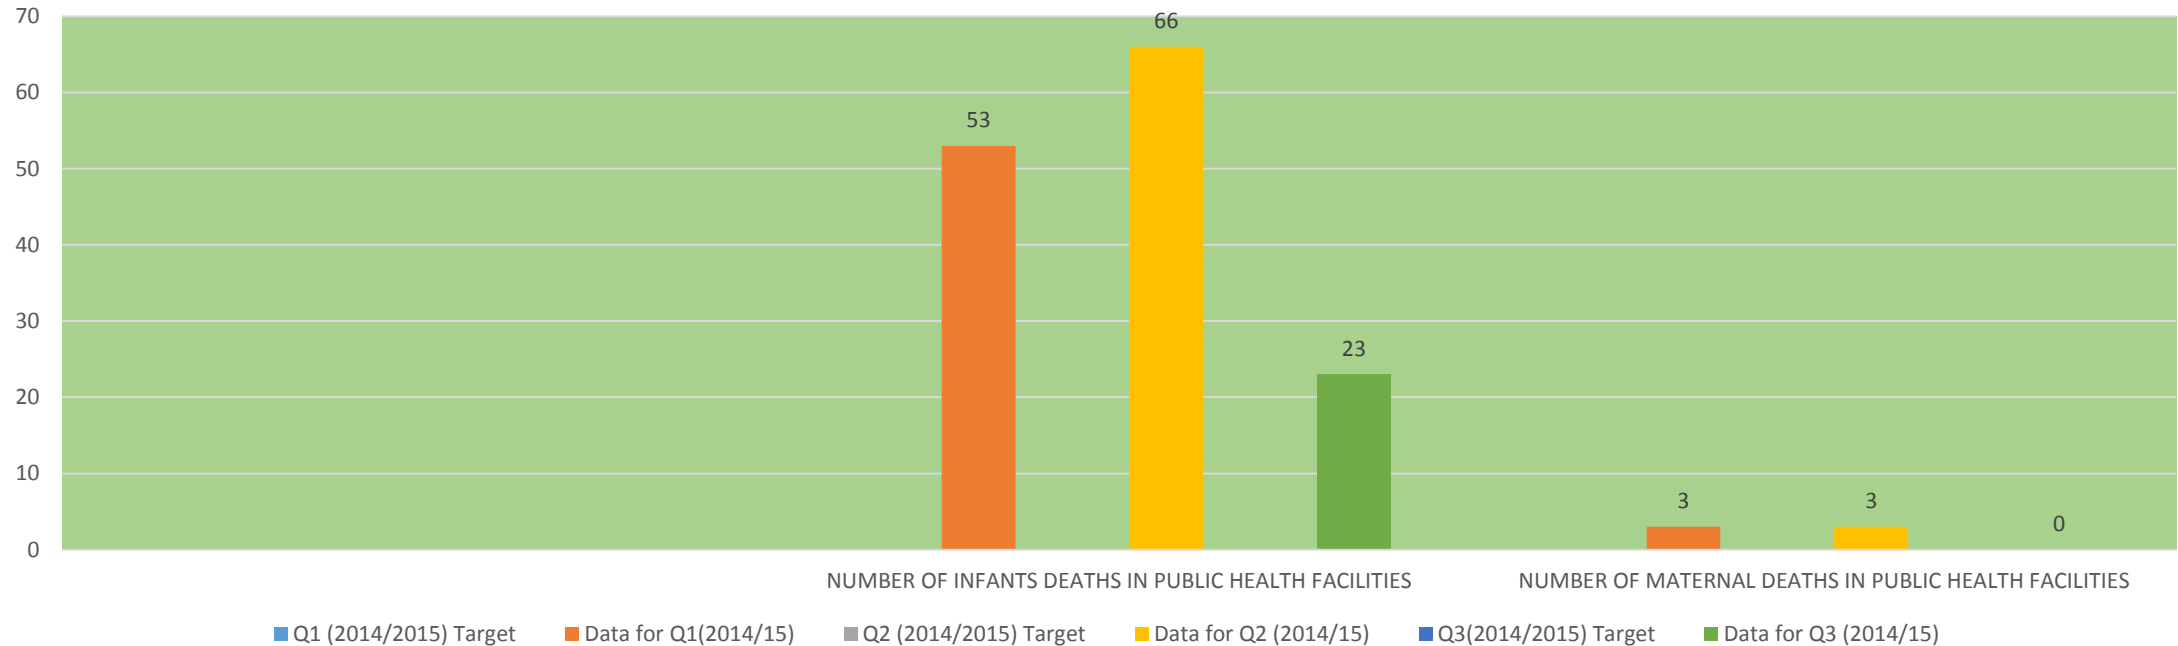

PMTCT

BABY HIV ANTIBODY TEST POSITIVE AT 18 MONTHS RATE

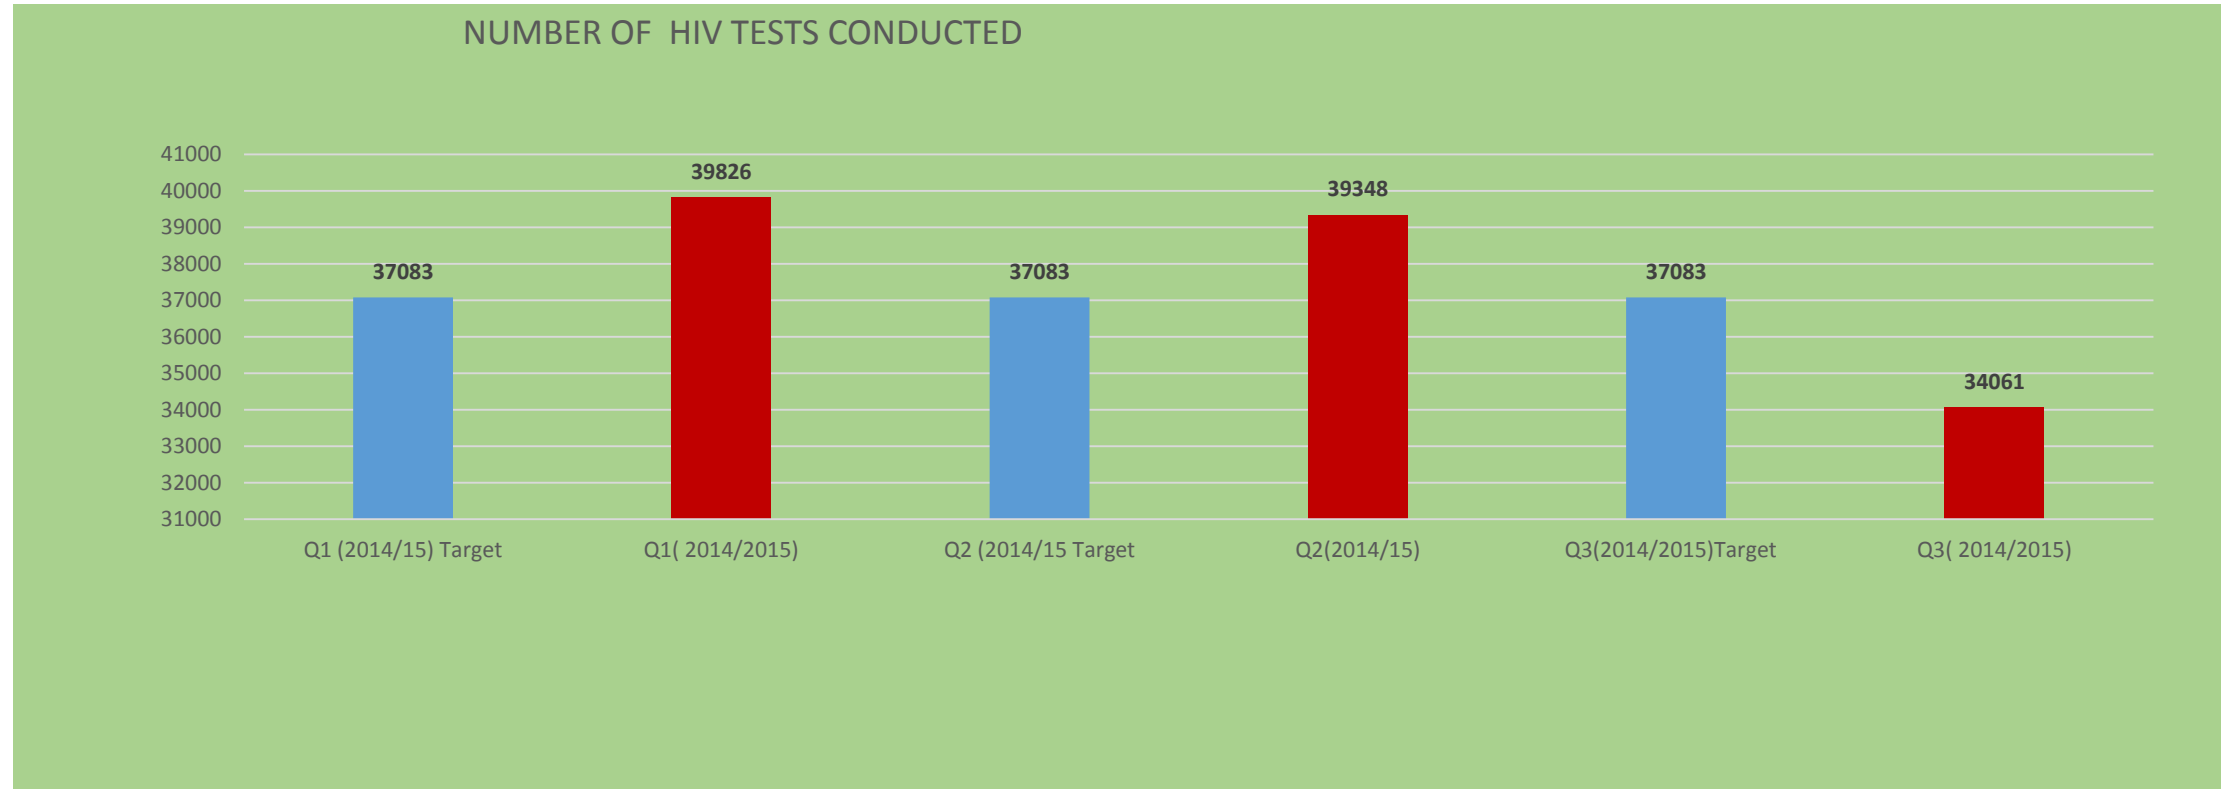

- The transmission of HIV from mother to child at 6 weeks and at 18 months is decreasing. There is a continuous monitoring of PMTCT guidelines in implementation to ensure elimination of mother to child transmission

Maternal Child & Women's Health

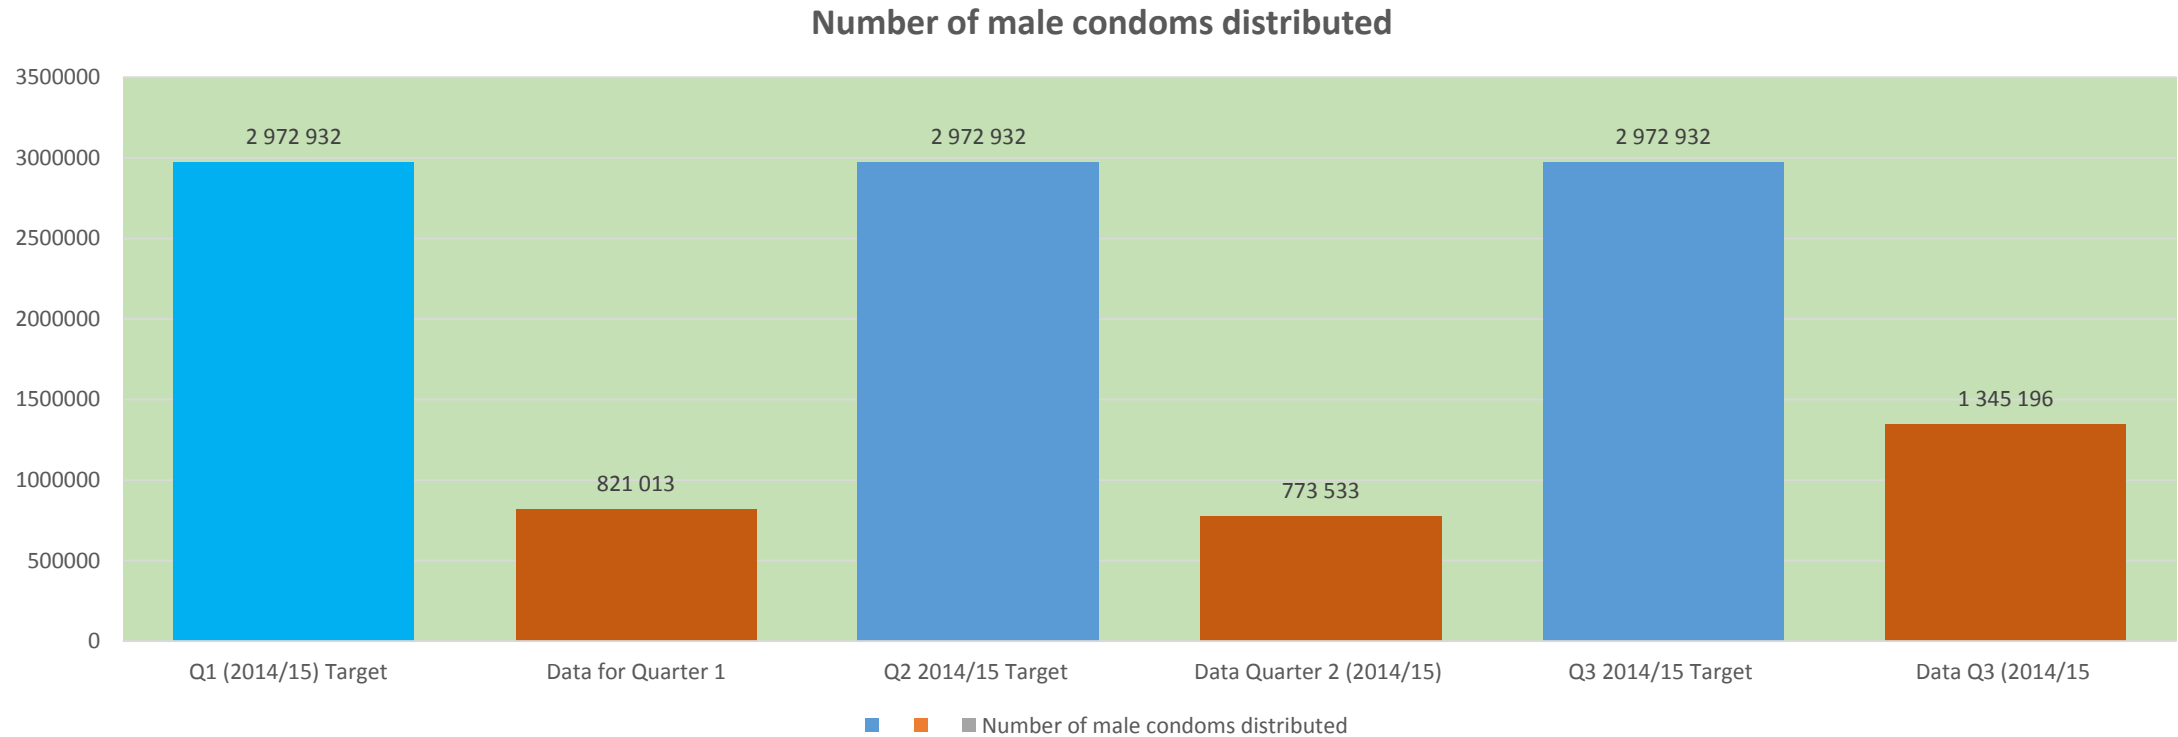

- There is an increase in child under one year death at Jozini Local Municipality. The District specialist team has planned to conduct trainings on the child health care in the forth quarter.

HCT & TB Screening

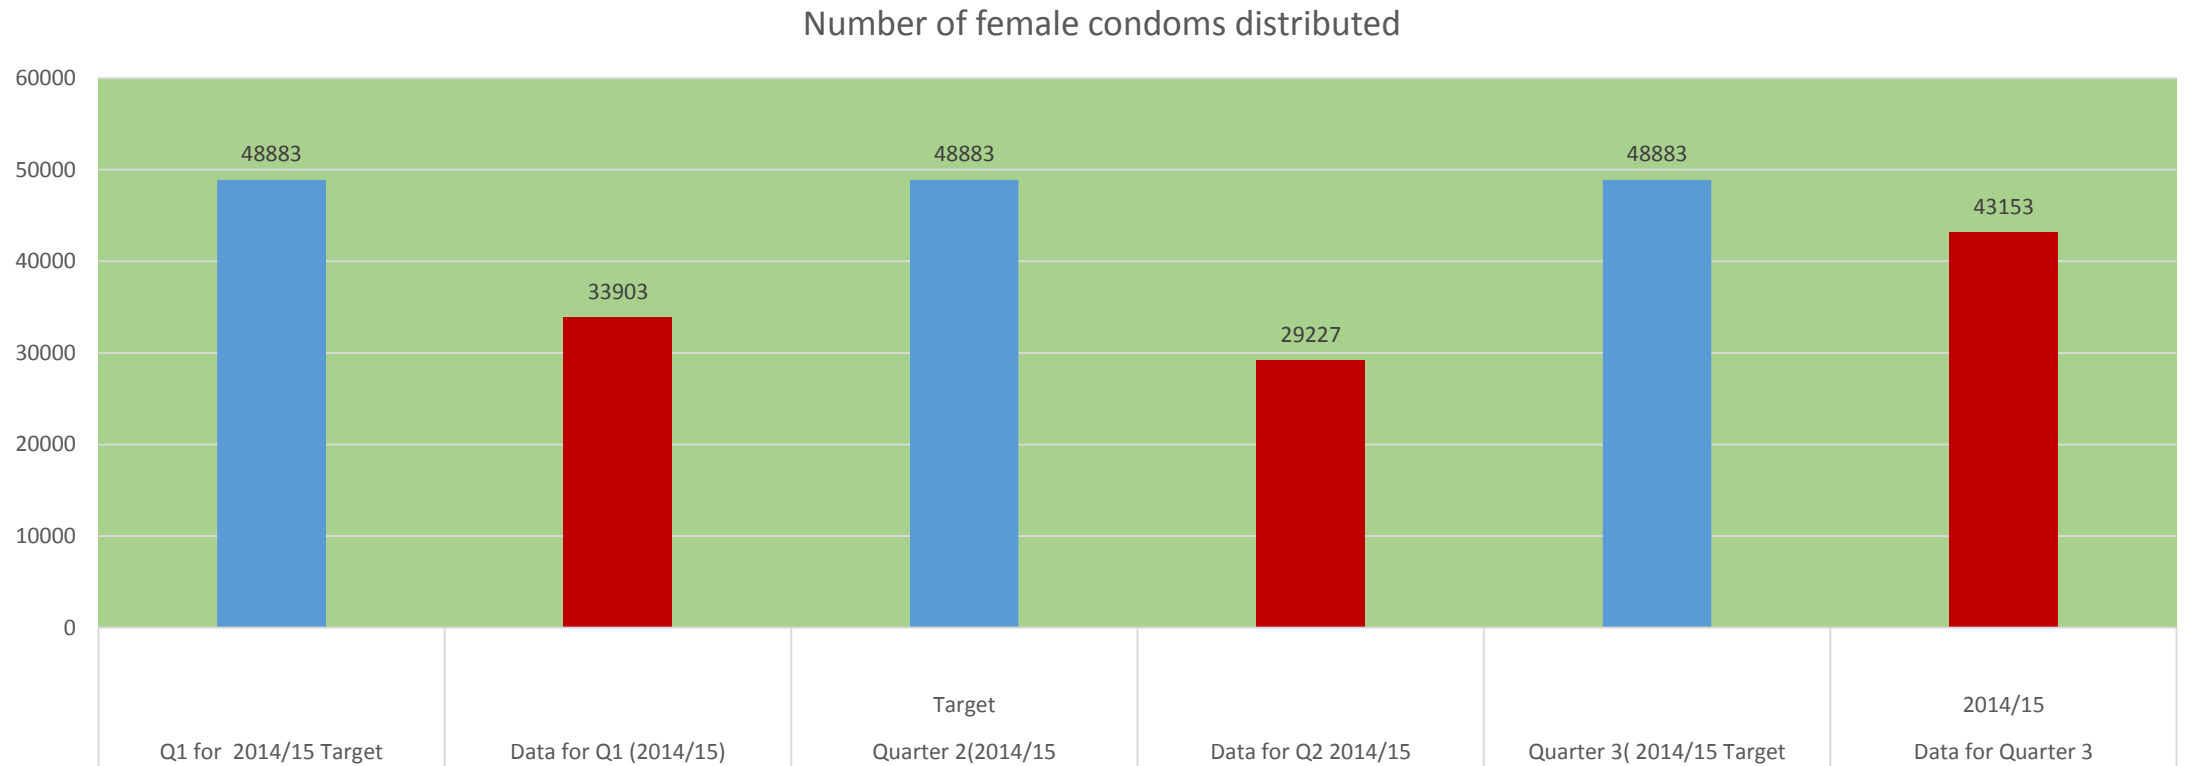

- The HIV testing rate is at 99%, though there was a shortage of testing kit in some facilities in December due to the change in suppliers in stock levels.

Condom Distribution

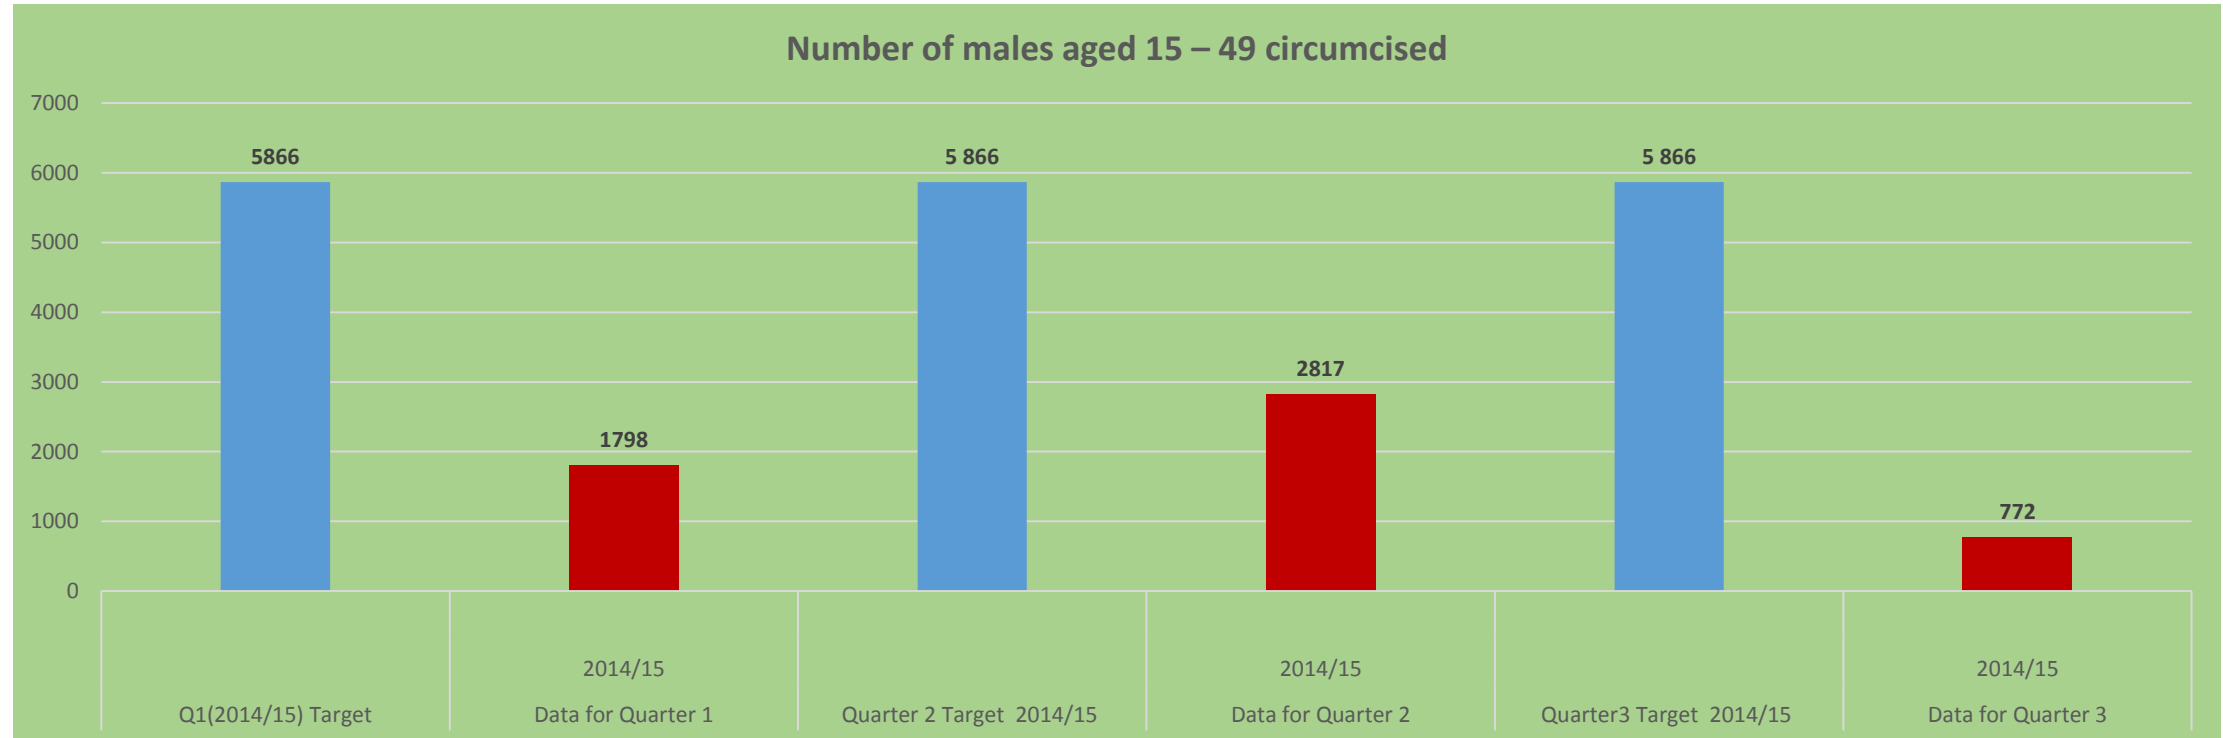

- Condom distribution is below the said target due to erratic supply to facilities for both male and female condoms.

Condom Distribution

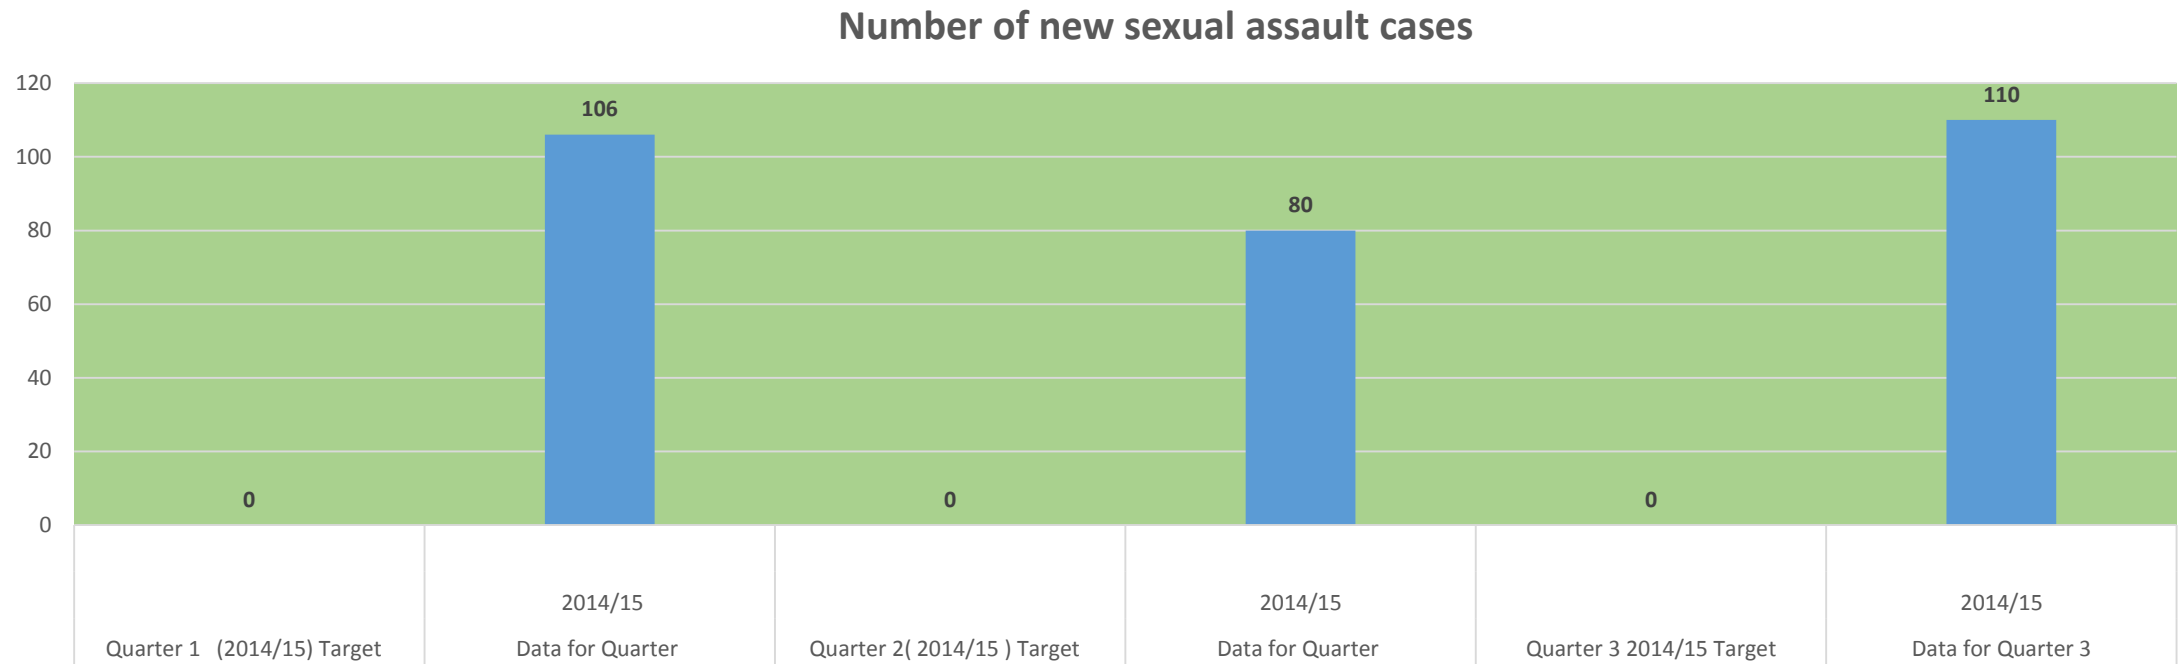

Male Medical Circumcision

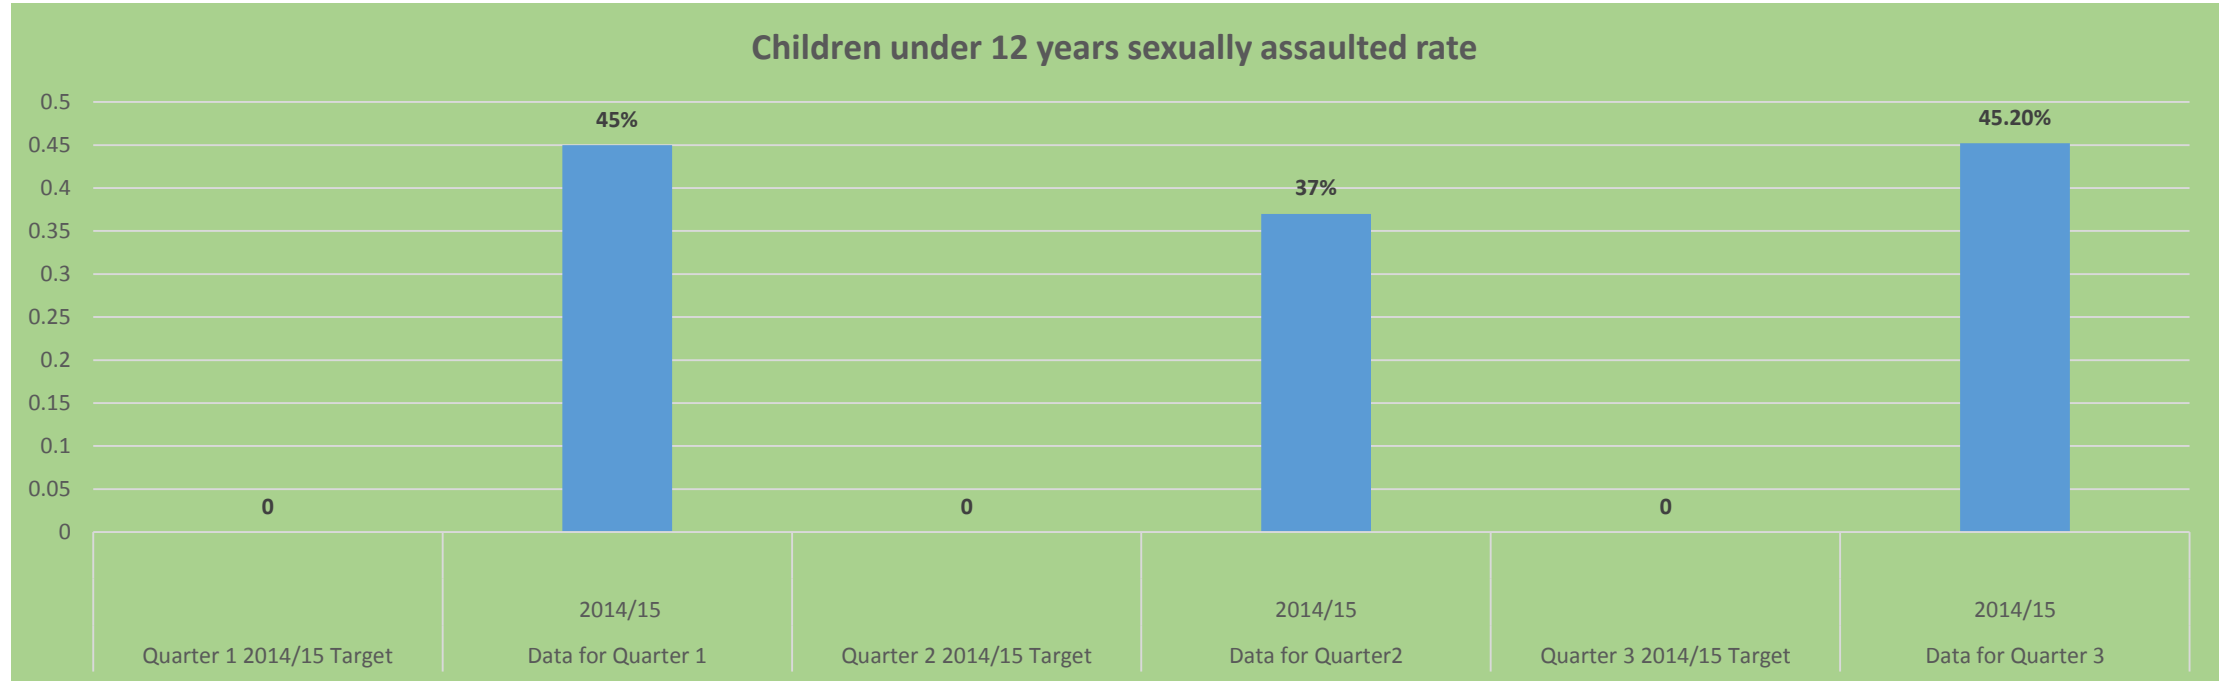

- Number of males circumcised is decreasing as compared to last two quarters this is due to the fact that there is non existence of hospitals MMC Teams which causes poor circumcision uptake. There is also poor attendance of males during MMC camps. All hospitals will revive their MMC Teams and strengthen mobilisation strategies to get more men circumcised.

Prevention of HIV Transmission from occupational exposure, sexual violence

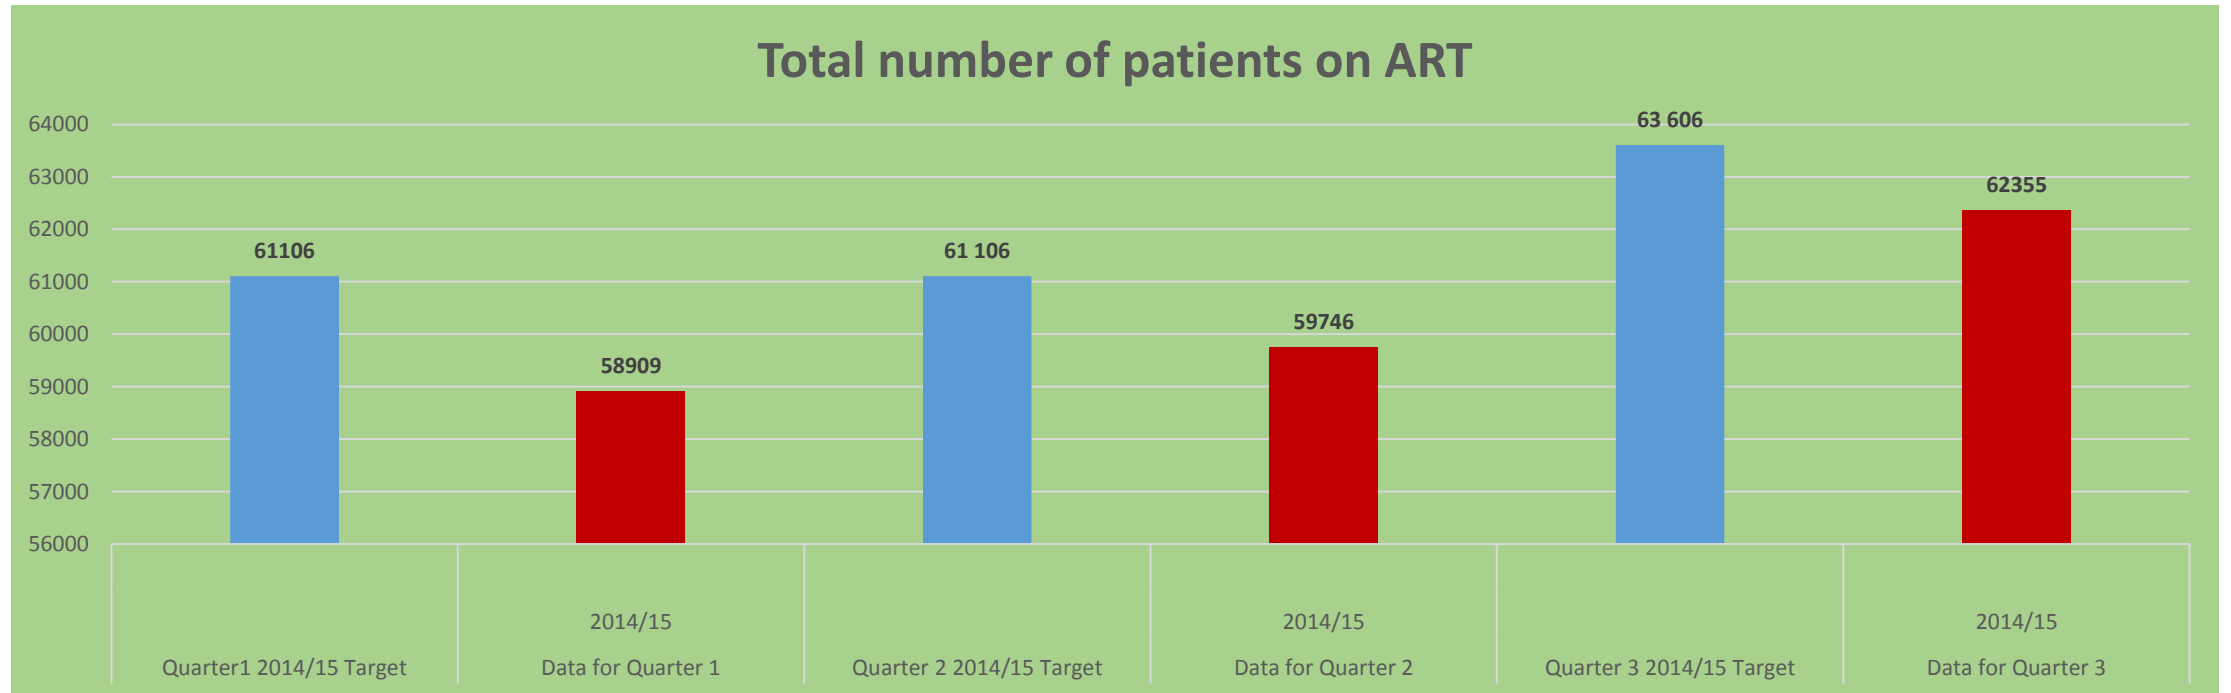

- There is an increase of new sexual assault as compared to last two quarters. However all Local Municipalities with partners has programmes in place to fight against sexual assault.

Prevention of HIV Transmission from occupational exposure, sexual violence

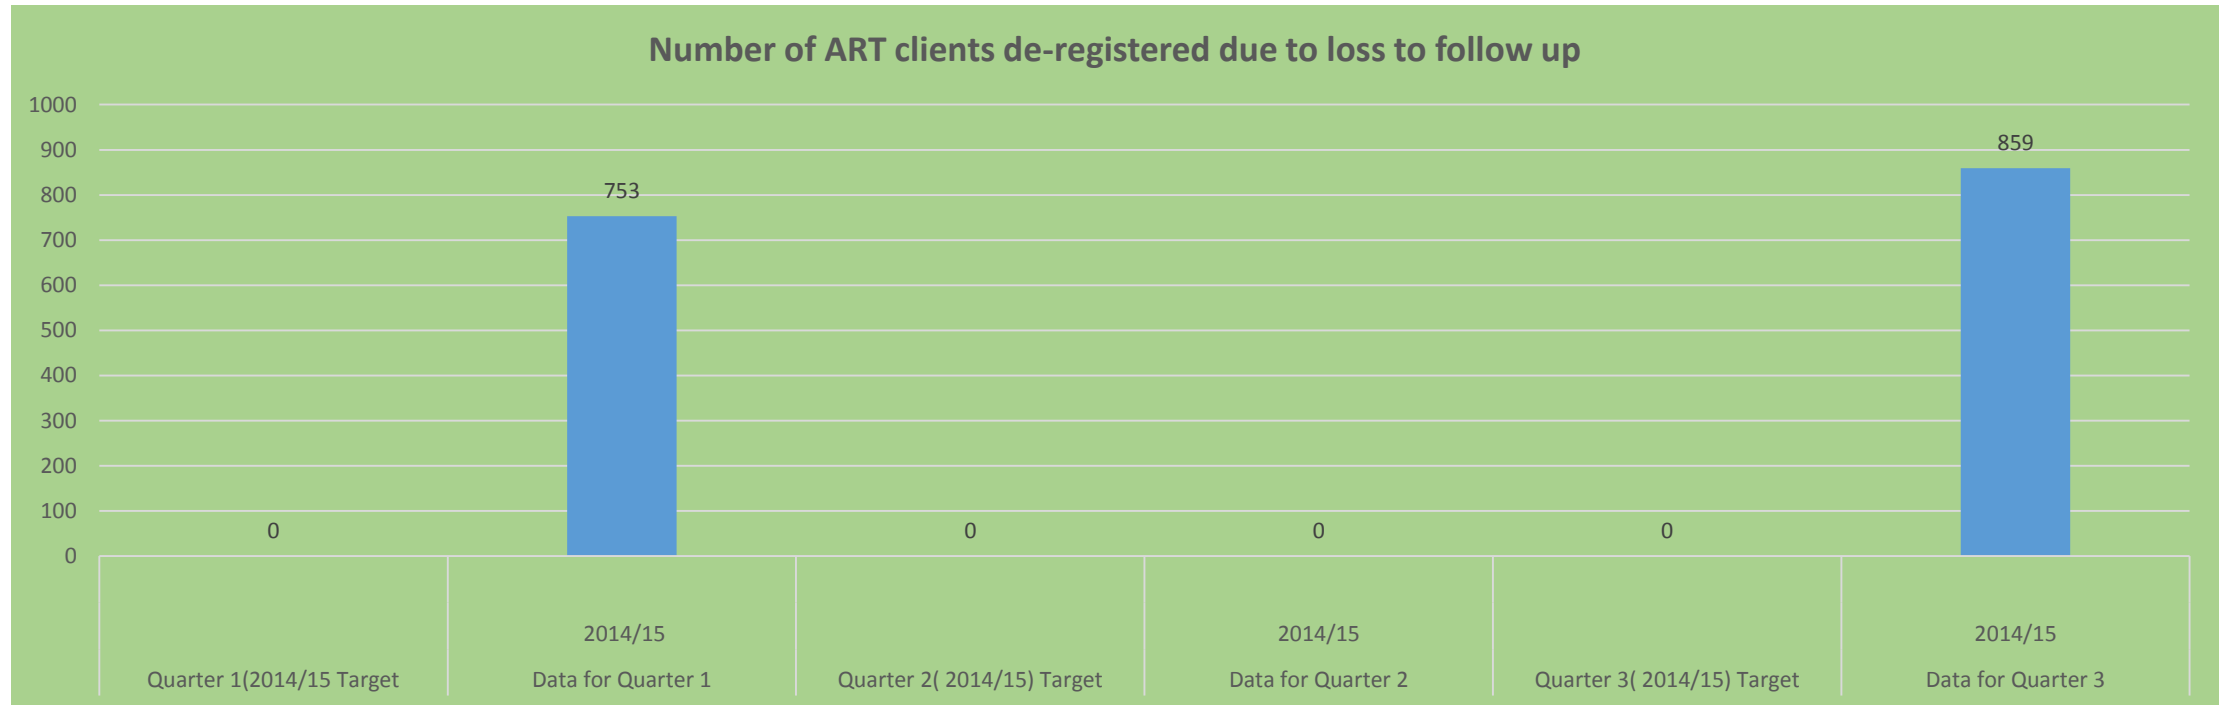

Comprehensive ART Services & adherence, monitoring

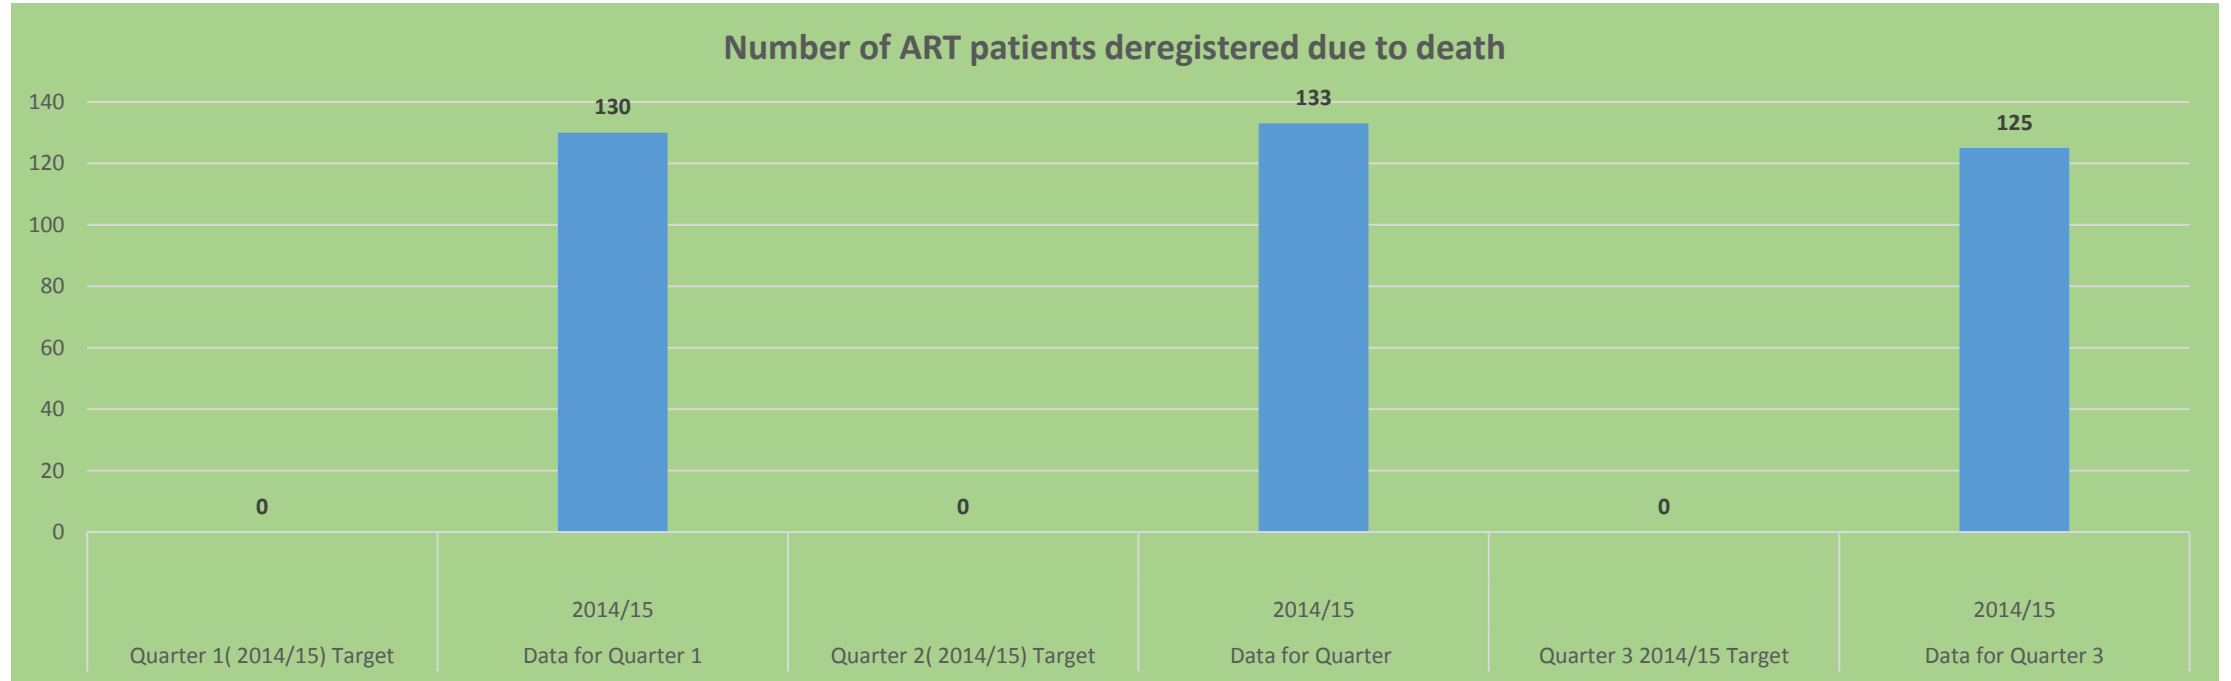

- 59/61 health facilities are using electronic ART Register(3 TIER system)

Comprehensive ART Services & adherence, monitoring

- In Q2 figures were incorrectly captured.

Prevention of HIV Transmission from occupational exposure, sexual violence

Co ordination, Monitoring & Evaluation
