## (FY 2022/23 Q1- April to June 2022) Action Item Update:

| Challenge ( Previous Reporting Quarter)  | Mitigation (Plans to Address Challenge)  | Status (Actions Taken)   |
|--|--|--|
| Number of children with severe acute malnutrition (SAM) still high with 53 in Q4 2021/2022 financial year and in Q1 2022/2023 it remained 53 | <p>Strengthen early identification of children with malnutrition</p> <p>To encourage caregivers to bring children under 5 years to clinic monthly for weighing</p> | <p>Outreach teams to revive Phila Mntwana Sites.</p> <p>Implementation of IMCI guidelines and plotting of road to health graph to identify early children below the z score.</p> <p>Recording of MUAC for every child attending the clinic and during outreach services.</p> |

## Key Activities: Q1: April to June 2022

Monitor closely condoms collected by facilities at Primary Distribution Sites on weekly basis.

Visit clinics to monitor their stock.

Scale up outreach services and mobilize for HIV testing

Conduct HIV risk assessment to identify clients for HIV testing

Do index testing

Mobilize for PrEP as the entry point for HIV testing

Implement Literacy sessions for care givers of children to improve treatment adherence and care for all children on ART.

Revive Phila Mntwana sites, and during outreach services, do MUAC to all under 5 children.

Link all children not gaining weight with community health care workers for closely monitoring to prevent SAM (Severe Acute Malnutrition).

## **Achievements / Successes: Q1: April to June 2022**
